EXPLANATION – Matter in *bolded italics* is new; matter between brackets ~~omitted material~~ is material to be omitted.

SENATE CONCURRENT RESOLUTION—Recognizing the second week in May as Melanoma and Skin Cancer Detection and Prevention Week in Nevada and encouraging the public to take measures to decrease incidents of skin cancer.

- 1 WHEREAS, One in five Americans will get skin cancer in his
- 2 lifetime; and
- 3 WHEREAS, More than one million new cases of skin cancer, a
- 4 potentially deadly disease and the most common of all types of
- 5 cancer, will be diagnosed in the United States this year; and

* S C R 2 8 *

1 WHEREAS, Most people do not realize that the skin is the largest
2 and most visible organ of the body and performs many essential
3 tasks; and

4 WHEREAS, Melanoma, the most deadly form of skin cancer, is
5 now the fastest growing cancer in the United States, with cases
6 increasing at an epidemic rate; and

7 WHEREAS, One American dies from melanoma every 62
8 minutes, and 116,500 new cases of melanoma are projected to be
9 diagnosed this year; and

10 WHEREAS, In 2008, 480 Nevadans were diagnosed with
11 melanoma; and

12 WHEREAS, Melanoma is the second most common cancer in
13 adolescents and young adults ages 15 to 29 and is the leading cause
14 of cancer death in women ages 25 to 30 and the second only to
15 breast cancer in women ages 30 to 34; and

16 WHEREAS, The United States Department of Health and Human
17 Services has declared ultraviolet radiation from the sun and artificial
18 sources, such as tanning beds and sun lamps, as a known
19 carcinogen; and

20 WHEREAS, Evidence from several studies has shown that
21 exposure to ultraviolet radiation from indoor tanning devices is
22 associated with an increased risk of melanoma and nonmelanoma
23 skin cancer such as squamous cell carcinoma and basal cell
24 carcinoma, especially when a person is exposed at an early age; and

25 WHEREAS, More than 2.3 million teenagers use artificial tanning
26 devices each year, and more than 25 percent of American teenagers
27 have used tanning booths three or more times; and

28 WHEREAS, Skin damage from ultraviolet radiation is
29 cumulative, and its adverse effects, including skin cancer and
30 premature aging, often take years to become apparent; and

31 WHEREAS, Much of this damage occurs during the teenage years
32 as evidenced by the fact that skin cancer is occurring in younger
33 populations; and

34 WHEREAS, If detected and treated early, melanoma is often
35 curable, with monthly self-examination being one of the most
36 effective methods of early detection, as well as periodic checkups by
37 a doctor; and

38 WHEREAS, Some simple precautions to take include avoiding
39 the sun in peak hours, wearing protective clothing, using sunscreen
40 and sunglasses, and avoiding tanning beds and sunlamps; and

41 WHEREAS, The Nevada Cancer Institute, the official cancer
42 institute of the State of Nevada, combats melanoma by conducting
43 inventive immunotherapy research, providing melanoma patients
44 with cutting-edge treatments and clinical trials, and educating
45 Nevadans on sun-safety behaviors; and

1 WHEREAS, Organizations such as the American Cancer Society
2 and other statewide and local organizations collaborate as members
3 of the Nevada Cancer Council to bring together and coordinate
4 cancer prevention efforts, early detection, treatment, support and
5 research to improve the quality of life for everyone in Nevada; now,
6 therefore, be it

7 RESOLVED BY THE SENATE OF THE STATE OF NEVADA, THE
8 ASSEMBLY CONCURRING, That the members of the 75th Session of
9 the Nevada Legislature recognize melanoma as a serious health
10 issue and urge all Nevadans to avail themselves of information
11 concerning the prevention, early detection and treatment of
12 melanoma to reduce the occurrence of this deadly form of cancer;
13 and be it further

14 RESOLVED, That the Nevada Legislature formally recognizes
15 May as National Melanoma and Skin Cancer Detection and
16 Prevention Month and declares the second week of May as
17 Melanoma and Skin Cancer Detection and Prevention Week in
18 Nevada.
